**Subject:** TESTIMONY FOR JANUARY 30, 2018 ENERGY COMMITTEE MEETING

My power was shut off by DTE on Oct. 26, 2017 for refusal of a smart meter. I called that day to have a radio-off smart meter installed, but they told me it would take two business days to receive the radio-off meter, but the other meters could be installed immediately. That was a lie, they were out the next day to install radio off meters and said they would be back later to turn power back on, but never showed up. After many phone calls with extremely rude people passing me from department to department, over 2 1/2 hours on the phone, over a 5 1/2 day period my power was restored Oct. 31st (Halloween night) at 11PM. It took 5 big guys and 3 trucks to shut off the power to my box in the middle of my front yard and 2 big guys with two bucket trucks, flashers going middle of the night, traipsing with flash lights all over my property for over an hour, when they knew box was right on the front lawn. I lost most of food in the fridge, because I could only handle small generator. Had water flooding my backyard from backup sump pump and froze at night because it went down to 45 degrees. I have piles of research on these meters, from all over the world, they are extremely harmful to all life, and I do not want one on my house, nor would anyone who had two brain cells in their head or any common sense at all!!

Thank You,  
Nancy J. Ross

P.S. Wasn't able to catch them shutting me off till they were leaving, pictures below!
